

*Outrageously Dependable*

# THE MOST TRUSTED BATTERY ON THE ROAD, REIMAGINED FOR THE GREEN.

Our new, best-in-class golf car battery has been engineered with one thing in mind: longevity. Because a sub-par battery can turn a nice round of golf into a long walk back to the clubhouse. Our improved technology means fewer battery replacements and long life so you can focus on what matters.

# A VARIETY OF APPLICATIONS. ONE STANDARD OF DEPENDABILITY.

The dependability of an Interstate Batteries® partnership extends beyond the battery itself. Whether the battery is for a golf cart, RV or industrial equipment, you'll grow your business by providing customers with a quality product, building loyalty and trust.

## HIGH-DENSITY PASTE FORMULATION

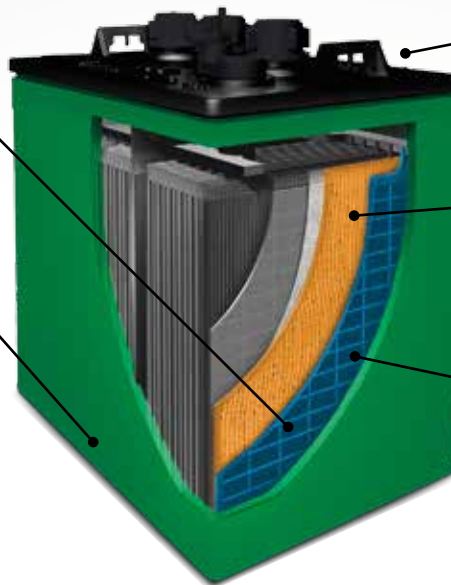

Specifically engineered to extend the life of conductive material while improving battery performance.

## MUDREST

Collects paste waste as the battery ages for optimal performance.

MADE IN THE USA

## EASY-ACCESS WATERING PORTS

For quicker maintenance to keep your battery running at peak performance.

## PREMIUM SEPARATOR TECHNOLOGY

Unique design forms a superior barrier between positive and negative plates allowing electrolytes to flow freely for maximum battery life.

## LEAD ANTIMONY GRID

Works in conjunction with the high-density paste to reduce corrosion and improve battery performance.
